

C7330

Repeater Programming Made Easy(er)

www.sigridco.com

C7330 is a software utility to assist you in programming your repeater controller.

C7330 saves you time.

C7330 processes your repeater controller command file by finding speech codes for words used, as well as encoding the correct CW character codes for CW messages.

With **C7330**, you can Include comments in your command files so your commands, profiles, and macros are self-documenting.

C7330 only \$19.95

Features:

- **Word code substitution**
- **CW character code substitution**
- **Support for the 7330, 7k & 5k controllers**
- **Live text editor**
- **Master & Control Operator password substitution**
- **Macro name prefix substitution**
- **Automatically removes comments & tabs**
- **Optionally removes spaces to reduce upload bandwidth requirements**
- **Drag & Drop - Just drag & drop your command file onto the input window**
- **User defined word/sounds code lookup**
- **Available for Mac OSX & Windows**

*You can focus on
the logic,
not the lookup.*

C7330 download and purchase available at: www.sigridco.com/C7330.html
